

Service in a Snap: Patrol First Aid Kit Maintenance

Estimated Time: 45–60 Minutes

Who: Any Scout or Adult. Inventory should be reviewed by an adult.

When: Conduct this check semi-annually when Patrol Leaders turn over.

Impact: High. Ensuring our scouts have functional, unexpired medical supplies.

Requirements: Conducting this check meets Tenderfoot Requirement 4d.

Your Mission

Inventory, purge, and restock one Patrol First Aid Kit to ensure it meets **Scouting America** standards and is ready for the next adventure. This kit should supplement Scout's personal 1st Aid Kits. The Troop / Scoutmaster Kit will contain equipment for longer events.

Preparation

1. **Pick up the Gear:** Coordinate with the Troop Equipment Coordinator to collect a Patrol First Aid Kit (red pouch in patrol box) and access the troop's "Consumable Stores". (Available most meetings)
2. **Paint Marker:** Needed for labelling kit and compartments
3. **Set up Space:** Find a clean, flat surface (like a kitchen table) to spread out the contents.

Step-by-Step Instructions

- **Step 1: Clean Out** – Empty the kit completely. Wipe down the inside of the pouch with a disinfecting wipe.
- **Step 2: Labelling** - Re-Label any faded markings from previous maintenance.
 - Note: This step may need to be conducted after figuring out where things fit.
- **Step 3: Expiry Check** – Examine every ointment, wipe, and medication (like water purification tablets). If it is expired or the packaging is compromised, **discard it**.
- **Step 4: Inventory** – Use the checklist below to see what is missing.
- **Step 5: Restock** – Pull replacements from the Troop Consumable Stores to fill the gaps.
- **Step 6: Pack** – Organize items logically (e.g., small bandages in one pocket, trauma gear in another). Ensure the **First Aid Manual** is easily accessible.
- **Step 7: Report** - Submit this inventory to Troop Equipment Coordinator.
 - Note any items still missing from your patrol kit and items that may be missing / expired in the consumables bin.

Patrol First Aid Kit Checklist

Confirm the kit contains the following items.

Item	Qty		Item	Qty
